Volume 7, 1958

SOVIET PHYSICS – CRYSTALLOGRAPHY: AUTHOR INDEX FOR Vol. 3, 1958

(Russian Original Vol. 3, 1958, The Journal Crystallography of the Academy of Sciences, USSR)

Abov, Iu. G., see Liashchenko, B. G. – 147

Abrosimova, L. N., see Pinsker, Z. G. – 285

Aleksandrov, K. S., see Chumakov, A. A. – 478

Aleksandrov, K. S., see Sil'vestrova, I. M. – 388

Aleksandrov, K. S. The Wave Surfaces for Elastic Waves in Crystals – 627

Aleksandrov, K. S. An Ultrasonic Pulse Method of Measuring the Elastic Moduli of Monoclinic Crystals – 630

Antsyshkina, A. S., see Porai-Koshits, M. A. – 694

Antsyshkina, A. S. A Crystallographic Study of Compounds of Ni and Co of the Type $MePy_4X_2$ – 747

Antsyshkina, A. S., and M. A. Porai-Koshits. An X-Ray Structural Investigation of Ni^{II} and Co^{II} Compounds of the type $MePy_4X_2$. II. The Structure of Crystals of Nickel Tetrapyridinedibromide and Cobalt Tetrapyridinedibromide – 684

Azarkh, Z. M., see Sof'ina, V. V. – 544

Bagariatskii, Iu. A. Unit Cell Determination of a Precipitation Phase from One Rotation Photograph of a Single Crystal of the Original Phase Along With Particles of the New Phase, p. 8

Bagariatskii, Iu. A. An X-Ray Investigation of Aging in Aluminum Alloys. V. The Use of Special Types of Photographs to Elucidate the Peculiarities of the Structure of Alloys – 574

Bagariatskii, Iu. A. An X-Ray Investigation of Aging in Aluminum Alloys. VI. Methods of Calculating Diffuse Scattering – 582

Bagariatskii, Iu. A. and G. I Nosova. Exact Determination of the Atomic Coordinates in the Metastable ω-Phase of Ti-Cr Alloys – 15

Bagdasarov, Kh. S. The Effect of Ultrasonic Vibrations on the Solution Process in Monocrystals – 109

Batrak, E. N. An Investigation of Centers of Capture of Irradiated Quartz Crystals with Inserted Na Ions – 102

Batrak, E. N. A Model for the Color and Luminescence Centers in Quartz – 633

Batrak, E. N. Thermal Emission and Decolorization in X-Irradiated Quartz – 635

Beliaev, L. M., see Belov, N. V. – 254

Beliaev, L. M., G. S. Belikova, V.M. Fridkin, and I. S. Zheludev. On the Question of the Electret State in Naphthalene – 772

L. M. Beliaev, V. A. Perl'shtein and V. P. Panova. Investigation of Activator Distribution in Alkali Halide Crystals by the Radioactive-Tracer Method – 510

Belikova, G. S., see Beliaev, L. M. – 772

Belov, N. V., see Borisov, S. V. – 85

Belov, N. V., see Borisov, S. V. – 274

Belov, N. V., see Donnay, Gabrielle – 642

Belov, N. V., see Simonov, V. I. – 429

Belov, N. V. The Quartz Extinction Law – 83

Belov, N. V. The Face Morphology of Crystals in the Light of Their Fine Structure – 222

Belov, N. V. On the Way of Creating A Full-Fledged Soviet Crystallography Text – 250

Belov, N. V. Project for a University Course on Fedorov Groups – 777

Belov, N. V., L. M. Beliaev, G. B. Bokii, G. E. Bronnikova, B. K. Vainshtein, G. S. Zhdanov, V. I. Iveronova, A. I. Kitaigorodskii, and Z. G. Pinsker. IV. The International Congress of Crystallographers – 254

Belov, N. V., E. N. Belova and T. N. Tarkhova. More About the Color Symmetry Groups – 625

Belov, K. P., A. A. Popova, and E. V. Talalaeva. Electrical and Magnetoresistance Properties of Single Crystals of Manganese Ferrite – 738

Belov, K. P., and A. V. Zalesskii. Thermal Expansion and Magnetostriction of Pyrrhotite – 390

Belova, E. N., see Belov, N. V. – 625

Bokii, G. B., see Belov, N. V. – 254

Bokii, G. B., see Pliasnina, I. I. – 761

Borisov, S. V., V. P. Golovachev and N. V. Belov. On the Arbitrarily Assigned Signs in the Direct Methods of Determination on Crystal Structures – 274

Borisov, S. V., and V. P. Golovachev. On the Precise Determination of the Camera Radius by X-Ray-Diffraction Photographs – 386

Borisov, S. V., P. V. Pavlov and N. V. Belov. A Graphical Method for Solving the Fundamental Harker-Kasper Inequalities – 85

Bronnikova, G. E., see Belov, N. V. – 254

Bublik, A. I. and A. G. Buntar'. Electron Diffraction Study of the Structure of Liquid Metals and Alloys – 31

Buntar', A. G., see Bublik, A. I. – 31

Bykov, V. N., and S. I. Vinogradov. Concerning the Arrangement of the Carbon Atoms in the Austenite Lattice – 308

Chernov, A. A. Surface Tension in Crystals — 225

SOVIET PHYSICS–CRYSTALLOGRAPHY: SUBJECT INDEX FOR VOL. 3, 1958

(Russian Original Vol. 3, 1958, The Journal Crystallography of the Academy of Sciences, USSR)

Absorption and refraction surfaces of absorbing crystals – 592

Absorption of droplets of emulsion by a growing crystal during crystallization from solutions – 217

Absorption spectra of cobalt compounds – 171

AB_8 structural types – 232

AB_{12} structural types, close-packed – 362

Accommodation, zone of, in twinned zinc – 332

Acridine-anthracene system, structure of mixed crystals – 157

Activator distribution in alkali halide crystals, study by radioactive-tracer method – 510

Aging in aluminum alloys, methods of calculating diffuse scattering – 582

Aging in aluminum alloys, study by special types of X-ray photographs – 574

Alkali halide crystals, study of activator distribution by radioactive-tracer method – 510

Alloys, liquid, electron-diffraction study – 31

Al_2O_3 crystals, synthetic, internal stresses in – 599

Alpha-methylbenzylamine tartrate, unit cell and space group – 372

Aluminum alloys, aging in, methods of calculating diffuse scattering – 582

Aluminum alloys, aging in, study by special types of X-ray photographs – 574

Aluminum guanidine sulfate hexahydrate, thermal expansion of – 230

Aluminum guanidine sulfate, isomorphs of – 369

Amblygonite, structure determination by the minimum function method – 429

Aminoazobenzene, features of X-ray diffraction pattern – 622

Ammonium fluogermanate, cubic modification of – 27

Ammonium potassium tartrate, unit cell and space group – 372

Anisole-tin compound, structure of – 153

Anisotropic temperature factor, determination of the parameters – 421

Anisotropy, artificial, use in artificial cleavage – 73

Anisotropy, elastic, of KI, temperature-dependence of – 769

Anisotropy, magnetic, and crystal structure of magnetite – 348

Anisotropy of the polarization of photoelectrets of monocrystals of sulfur – 178

Ankerite, magnetic properties of – 606

Anthracene-acridine system, structure of mixed crystals – 157

Antiferroelectrics of perovskite type, phase transformations in – 759

Antiferromagnetics symmetry of – 341

Antiferromagnetics, symmetry of piezomagnetism of – 344

Antimony, crystallization in thin films – 716

Antimony-iridum compound – 367

Antisymmetry of textures – 269

Apparatus for measuring pyroelectric polarization of crystals – 53

Apparatus for microscopic investigation of the growth of crystals from solutions – 513

Apparatus URS-501, use as single-crystal diffractometer – 41

Application of A 400 kev electron-diffraction apparatus to the study of single crystals – 712

Arbitrarily assigned signs in the direct methods of determination on crystals structures – 274

Arrangement of the carbon atoms in the austenite lattice – 308

Artificial cleavage, use of artificial anisotropy in – 73

Atoms and molecules, inherent symmetry in a crystal – 527

Atomic coordinate determination, Cr-Ti omega phase – 15

Atomic scattering factors for electrons for the elements of the third period – 417

Austenite, arrangement of carbon atoms in – 308

$BaCl_2$, molten, crystallization of $BaTiO_3$ from – 212

Basic copper chloride, electron-diffraction study of – 445

$BaTiO_3$-$BaZrO_3$ system, electrical and X-ray studies of – 182

$BaTiO_3$, crystallization from molten $BaCl_2$ – 212

Belov's paper on a course on geometrical crystallography for physicists, comments on – 644

$BiIn_2$, structure of – 3

$BiNaNb_2O_7$-$Cd_2Nb_2O_7$, structure of – 73

Bi-Pd system, gamma-phase in – 506

Bi_3Rh, study of – 374

$Bi_{1.47-1.89}Tl$, possible structure of — 3
Bonding in LiH crystals, nature of — 503
Boric acid, p-bromophenyl-, structure of — 564
Borides, rare-earth, X-ray study of — 90
Boron sulfide, tribromo-, structure of — 569
Bounded generalized electron-density projections — 672
Bromophenylboric acid, para-, structure of — 564

Cadinene dihydrobromide, structure of — 281
Calcite, mechanically twinned, lattice distortion at twin boundary — 328
Camera, electron-diffraction, "EG" — 358
Camera radius, determination by X-ray diffraction photographs — 386
Camera, X-ray, for studies at -175° to +300°C — 639
Capture centers in irradiated quartz crystals — 102
Carbon atoms, arrangement in austenite — 308
$CaSO_4 \cdot \frac{1}{2} H_2O$, oriented crystallization on gypsum — 239
$Cd_2Nb_2O_7$, systems with $Sr_2Nb_2O_7$ and $NaBiNb_2O_7$, structure of — 78
Centrosymmetric molecules, impossibility of distributing in noncentrosymmetric groups — 393
Certain general rules regarding the reflection of light from crystals — 325
Certain results of compression tests on naphthalene monocrystals — 65
Change in form of liquid inclusions with change in temperature — 202
Charles Mauguin (1878-1958) — 498
C-H distance in paraffins, electron-diffraction determination — 452
Chemical bond in LiH crystal, nature of — 503
Chromium guanidine sulfate, isomorphs of — 369
Cleavage, artificial, use of artificial anisotropy in — 73
Close-packed structures of composition AB_{12} — 362
Cobalt compounds, absorption spectra of — 171
Cobalt diisorhodanotetrapyridine, structure of — 694
Cobalt, diisothiocyanato tetrapyridine, structure of — 694
Cobalt diparatoluidine diiodide, study of — 365
Cobalt tetrapyridinedibromide, structure of — 684
Color and luminescence centers in quartz, model for — 633
Color symmetry groups — 625
Comments on academician Belov's paper "a course on geometrical crystallography for physicists" — 644
Complexes containing the Me-S bond — 756
Complexes of type $MePy_4X_2$, structures of — 684
Complexes of type $MePy_4X_2$, structure of — 894
Complexes of type $MePy_4X_2$, study of — 747
Compression tests on naphthalene crystals — 65
Conference on X-ray diffractometry — 399
$CoPy_4X_2$ complexes, study of — 747
Corundum crystals, synthetic, internal stresses in — 599
Course on geometrical crystallography for physicists, comments on Belov's paper on — 644
Course, university, on Fedorov groups, project for — 777
Crednerite, $CuMnO_2$, structure and composition of — 703
Critical shear stress, temperature, and deformation rate in Zn crystals — 59
CrN, cubic, electron-diffraction study of — 285
Cr-Tl omega phase, atomic coordinate determination — 15
Crystal and molecular structure of stannic anisole (stannic methoxybenzene) — 153
Crystal-chemical hydrogen, data on — 298
Crystal growth, absorption of emulsion droplets during — 217
Crystal growth and evaporation, role of liquid drops in — 611
Crystal growth around solid particles, formation of screw dislocations in — 206
Crystal growth from solutions, apparatus for microscopic study — 513
Crystal holder, low-temperature, for EG electron-diffraction camera — 507
Crystallization of $BaTiO_3$ from molten $BaCl_2$ — 212
Crystallization, oriented, of $CaSO_4 \cdot \frac{1}{2} H_2O$ on gypsum — 239
Crystallochemical analysis of the temperature phase transformations in ferro- and antiferroelectrics with the perovskite structure — 759
Crystallographers, fourth international congress of — 254
Crystallographic study of compounds of Ni and Co of the type $MePy_4X_2$ — 747
Crystallography, geometrical, course for physicists, comments on Belov's paper on — 644
Crystallography text, Soviet, how to create — 250
Crystal optics, method of invariants in — 48
Crystal orientation, determination by Laue diagrams — 525
Crystal orientation, determination by X-rays — 516
Crystals, absorbing, refraction and absorption surfaces of — 592
Crystals, dislocation in — 112
Crystals, electrooptic effect in — 647
Crystals, inherent symmetry of atoms and molecules in — 527
Crystals, ions in — 235

Crystals, monoclinic, elastic moduli, measurement by ultrasonic pulse method — 630
Crystals of potassium tetraborate tetrahydrate $K_2B_4O_7 \cdot 4H_2O$ — 88
Crystals, pyroelectricity of, apparatus for measuring — 53
Crystals, rules for reflection of light from — 325
Crystals, solution of, and spiral growth — 481
Crystals, surface tension in — 225
Crystals, symmetry of magnetostrictive properties of — 765
Crystal-structure analysis, functional projections for — 667
Crystal-structure analysis, possibilities of — 663
Crystal structure and composition of crednerite, $CuMnO_2$ — 703
Crystal structure and magnetic anisotropy of magnetite — 348
Crystal structure and morphology — 222
Crystal-structure determination, arbitrarily assigned signs in direct methods of — 274
Crystal structure of cadinene dihydrobromide — 281
Crystal structure of halogen derivatives of diazoaminobenzene — 228
Crystal structure of p-bromophenylboric acid — 564
Crystal structure of the systems $Cd_2Nb_2O_7$-$Sr_2Nb_2O_7$ and $Cd_2Nb_2O_7$-$NaBiNb_2O_7$ — 78
Crystal structure of tribromoboronsulfide — 569
Crystals, wave surfaces for elastic waves in — 627
CsI and CsBr, mechanism of twinning in — 337
Cubic modification of $(NH_4)_2GeF_6$ — 27
Cubic system, edge forms of — 407
$CuCl_2 \cdot 3Cu(OH)_2$, electron-diffraction study of — 445
$CuMnO_2$, crednerite, structure and composition of — 703
Cyclosilicates, infrared reflection spectra of — 761

Data on crystal-chemical hydrogen — 298
Decolorization and emission, thermal, in X-irradiated quartz — 635
Deformation rate, critical shear stress, and temperature in Zn crystals — 59
Deformed crystals of NaCl, study by X-ray microbeam — 80
Derivation of new shubnikov groups — 401
Determination of camera radius by X-ray diffraction photographs — 386
Determination of the orientation of single crystals from Laue diagrams — 525
Determination of the parameters of the anisotropic temperature factor — 421
Determination of the piezoelectric constant d_{31} from the radial vibrations of a disc — 105
Determination of the structure of amblygonite by the minimum-function method — 429
Determination of the structure of InSe by electron diffraction — 292
Determination of the structure of ScB_2 by X-ray diffraction — 76
Determination of the structure of the isomorphous series $[C(NH_2)_3][M(H_2O)_6][EO_4]_2$, M = Al, Cr; E = S, Se — 389
Determination of the structure of Tl_2Se by the electron-diffraction method — 140
Determination of the unit cell dimensions and space group of the $^1/_3H_2O$ — 373
Diamonds, inclusions in — 494
Diazoaminobenzene, structure of halogen derivatives — 228
Dibenzyl-stilbene solid solutions, structure of — 707
Dielectric properties of L-rhamnose monohydrate — 478
Dielectric properties of $MgSO_4 \cdot 7H_2O$ — 722
Dielectrics, linear, electrostriction of — 312
Diffractometer, single-crystal, use of apparatus URS-501 as — 41
Diffractometry, X-ray, conference on — 399
Diffuse, scattering, methods of calculating in study of aging in Al alloys — 582
Diparatoluidine cobalt diiodide, study of — 365
Directed splitting of material, use of artificial anisotropy in — 73
Direct methods of crystal-structure determination, arbitrarily assigned signs in — 274
Dislocation in crystals — 112
Dislocation, mobility of, in Frenkel-Kontorova model — 193
Dislocation, screw, formation at junction of two spreading layers — 236
Dislocations, screw, formation in crystal growth around solid particles — 206
Distortion of the crystal lattice on the twin boundary of a mechanical y twinned calcite crystal — 328

Edge forms of the cubic system — 407
Effect of ultrasonic vibrations on the solution process in monocrystals — 109
EG electron-diffraction camera — 358
EG electron-diffraction camera, low-temperature crystal holder for — 507
Elastic and piezoelectric properties of terpine monohydrate crystals — 388
Elastic anisotropy of KI, temperature-dependence of — 769
Elastic moduli of monoclinic crystals, measurement by ultrasonic pulse method — 630
Elastic properties of L-rhamnose monohydrate — 478
Elastic properties of $MgSO_4 \cdot 7H_2O$ — 722
Elastic properties of neutron-irradiated quartz — 726

Elastic waves in crystals, wave surfaces for — 627
Electret state in naphthalene — 772
Electrical and magnetoresistance properties of single crystals of manganese ferrite — 738
Electrical and X-ray diffraction studies of the $BaTiO_3$-$BaZrO_3$ system — 182
Electrical erosion on monocrystals — 618
Electron-density Fourier projections, generalized — 531
Electron-density projections, generalized, normal and bounded — 672
Electron-diffraction apparatus, 400 kev, application to single crystals — 712
Electron-diffraction camera "EG" — 358
Electron-diffraction camera EG, low-temperature crystal holder for — 507
Electron-diffraction determination of the C-H distance in some paraffins — 452
Electron-diffraction investigation of tungsten nitrides — 551
Electron-diffraction patterns, simultaneous production for an investigated substance and a standard — 754

Groups, symmetry, color — 625
Growing of crystals of L-rhamnose monohydrate and study of their dielectric, piezoelectric, and elastic properties — 478
Growing of terpine monohydrate crystals and their elastic and piezoelectric properties — 388

Growing single crystals of sulfate heptahydrates — 243
Growth and evaporation of crystals, role of liquid drops in — 611
Growth of crystals in porous media — 487
Growth, layer-spiral, of methylnaphthalene — 352
Growth of crystals from solution, apparatus for microscopic study — 513
Growth, rhythmic, of triphenylmethane spherulites — 500
Growth, spiral, and solution of crystals — 481
Guanidine aluminum sulfate hexahydrate, thermal expansion of — 230
Guanidine aluminum sulfate, isomorphs of — 369
Gypsum, oriented crystallization of $CaSO_4 \cdot \frac{1}{2}H_2O$ on — 239

Halogen derivatives of diazoaminobenzene, structure of — 228
Harker-Kasper inequalities, graphical method for — 85
Harker sections, a method of rotating — 637
Heptahydrates, sulfate, growing single crystals of — 243
Hg_2Na, possible structure of — 3
Hg_2U, possible structure of — 3
High-and-low-temperature X-ray camera — 639
High-pressure melting point of potassium — 512
HoB_4, X-ray study of — 90
Horizontal electron diffraction camera "EG" — 358
Hydrogen, crystal-chemical, data on — 298
H-Zr and H-Ti systems, phase analysis by X-rays — 544

Imperfections in metallic monocrystals, neutron-diffraction study of — 147
Impossibility of distributing centrosymmetric molecules in noncentrosymmetric groups — 393
In_2Bi, structure of — 3
Inclusions in diamonds — 494
Inclusions, liquid, change in form with temperature — 202
Inequalities, Harker-Kasper, graphical method for — 85
Inert gases, theory of crystals of — 395
Infrared reflection spectra of the cyclosilicates in the wavelength interval from 7-15 μ — 761
Inherent symmetry of atoms and molecules in a crystal — 527
InSe, electron-diffraction study of — 292
Internal complex compounds containing the Me-S bond — 756
Internal fields of some ferroelectrics with the perovskite-type structure — 471
Internal stresses in synthetic corundum crystals — 599
International congress of crystallographers, fourth — 254
Invariants, method of, in crystal optics — 46
Investigation of activator distribution in alkali halide crystals by the radioactive-tracer method. II — 510
Investigation of centers of capture of irradiated quartz crystals with inserted Na ions — 102
Investigation of deformed crystals of NaCl with an x-ray micro-beam — 80
Investigation of layer-spiral growth of methylnaphthalene crystals growing from ethyl alcohol solution — 352
Investigation of the process of crystallization of barium titanate from molten barium chloride — 212
Investigation of solid solutions of some n-paraffins — 303
Investigation of the structure of Fe_4N — 439
Ions in crystals — 235
Iron-nickel alloys, new phase in thin films of — 460
Iron-nickel solid solution, substructure of crystals during transition — 380
Iron nitride, structure of — 439
Iron-vanadium system, mutual orientation of phases upon decomposition of solid solutions — 377
Irradiated quartz crystals, capture centers in — 102
IrSb, study of — 367

$K_2B_4O_7 \cdot 4H_2O$ — 88
K, high-pressure melting point — 512
KI, temperature-dependence of elastic anisotropy of — 769
$K_2S_2O_3 \cdot \frac{1}{2}H_2O$, unit cell and space group — 373

Lattice constants of polycrystalline substances, method of determining — 383
Lattice distortion in mechanically-twinned calcite — 328
Laue diagrams, determination of crystal orientation by — 525
Layer-spiral growth of methylnaphthalene — 352
Layers, spreading, action in formation of screw dislocations at junction — 236
LiF crystals, study by etch method — 731
Light, rules for reflection from crystals — 325
LiH, crystalline, nature of chemical bond in — 503
Linear dielectrics, electrostriction of — 312
Liquid drops, role in crystal growth and evaporation — 611
Liquid inclusions, change in form with temperature — 202
Liquid metals and alloys, electron-diffraction study — 31
Low-and-high-temperature X-ray camera — 639

Low-temperature crystal holder for the EG electron-diffraction camera — 507
LuR_4, X-ray study of — 90
Luminescence and color centers in quartz, model for — 633

Magnetic anisotropy and crystal structure of a single crystal of magnetite at temperatures below the phase transition — 348
Magnetic properties of siderite, ankerite, and rhodochrosite — 606
Magnetism, piezo-, symmetry in antiferromagnetics — 344
Magnetite, magnetic anisotropy and crystal structure — 348
Magnetoresistance of monocrystalline Mn ferrite — 738
Magnetostriction and thermal expansion of pyrrhotite — 390
Magnetostrictive properties of crystals, symmetry of — 765
Manganese ferrite, monocrystalline, electrical and magnetoresistance properties of — 738
Mauguin, Charles (1878-1958) — 498
Measurement of internal stresses in crystals of synthetic corundum — 599
Mechanically-twinned calcite, lattice distortion at twin boundary — 328
Mechanism of twinning in CsI and CsBr — 337
Melting point of potassium at pressures up to 30,000 kg/cm^2 — 512
Mercaptide bond, complexes containing — 756
Mercury-uranium compound, possible structure of — 3
Metallic compounds, ternary, regularities in structures of — 465
Metallic monocrystals, study of imperfections by neutron diffraction — 147
Metals, liquid, electron-diffraction study — 31
Method for the simultaneous production by reflection of electron-diffraction patterns of an investigated substance and a standard — 754
Method of determining lattice constants of polycrystalline substances — 383
Method of invariants in the optics of transparent nonmagnetic crystals — 46
Method of rotating Harker sections — 637
Methods of calculating diffuse scattering in study of aging of Al alloys — 582
Methods of crystal-structure determination, direct, arbitrarily assigned signs in — 274
Methoxybenzene-tin compound, structure of — 153
Methylnaphthalene, layer-spiral growth of — 352
Mg_2SiO_4, structure of — 163
$MgSO_4 \cdot 7H_2O$ piezoelectric, elastic, and dielectric properties of — 722

Micas, thermal lattice expansion of — 92
Microbeam, X-ray, use in study of deformed NaCl crystals — 80
Microscope stage, tilting — 247
Microscopic study of crystal growth from solution, apparatus for — 513
Minimum function method, use in structure determination of amblygonite — 429
Mixed crystals in acridine-anthracene system, structure of — 157
$MnCuO_2$, crednerite, structure and composition of — 703
Mobility of dislocations in the Frenkel-Kontorova model — 193
Model for the color and luminescence centers in quartz — 633
Mode of vibration of double-convex quartz lenses of AT crystals — 774
Molecules and atoms, inherent symmetry in a crystal — 527
Monoclinic crystals, elastic moduli of, measurement by ultrasonic pulse method — 630
Monocrystalline sulfur photoelectrets, polarization anisotropy of — 178
Monocrystals, electrical erosion on — 618
Monocrystals, metallic, study of imperfections by neutron diffraction — 147
Monocrystals, naphthalene, compression tests on — 65
Monocrystals, solution of, effect of ultrasonics — 109
Monocrystals, zinc, critical shear stress, temperature, and deformation rate in — 59
Morphology and crystal structure — 222
Muscovite, thermal lattice expansion of — 92
Mutual orientation of the α-and σ-phases upon the decomposition of solid solutions in iron-vanadium alloys — 377

$NaBiNb_2O_7$-$Cd_2Nb_2O_7$, structure of — 78
NaCl, deformed crystals of, study by X-ray microbeam — 80
NaCl, temperature factor of — 744
$NaHg_2$, possible structure of — 3
Na ions, use in study of capture centers in irradiated quartz crystals — 102
Naphthalene crystals, compression tests on — 65
Naphthalene, electret state in — 772
Nature of the chemical bond in crystalline LiH — 503
Nature of the magnetic properties of siderite, ankerite and rodochrosite — 606
Nb_2O_5, polymorphism in — 750
Neutron-diffraction study of imperfections in metallic monocrystals — 147
Neutron-irradiated quartz, elastic properties of — 726

New compound Bi_4Rh in the system Bi-Rh established by means of X-ray diffraction — 374
New crystalline phase in thin films of Fe-Ni alloys — 460
New data on the crystal structure of Olivine — 163
New data on the structure of $BiIn_2$ and the possible structure of $TlBi_{1.27 \to 1.59}$, $NaHg_2$, UHg_2, UZr_2 and TiU_2 — 3
New determination of the crystal structure of thiourea — 559
New method of determining the refractive index of the extraordinary wave in twinned uniaxial negative dielectric crystals — 98
$(NH_4)_2GeF_6$, cubic modification of — 27
Nickel diisorhodanotetrapyridine, structure of — 684
Nickel, diisothiocyanato tetrapyridine, structure of — 694
Nickel tetrapyridinedibromide, structure of — 684
Ni-Fe alloys, new phase in thin films of — 460
Ni-Fe solid solution, substructure of crystals during transition — 380
Niobium mixed oxide systems, structure of — 78
$NiPy_4X_2$ complexes, study of — 747
Noble gases, theory of crystals of — 395
Noncentrosymmetric groups, impossibility of distributing centrosymmetric molecules in — 393
Nonmagnetic crystals, method of invariants in the optics of — 46
Normal and bounded generalized electron-density projections with the original phase — 672
n-Paraffins, solid solutions of — 303

Olivine, structure of — 163
Omega phase, Ti-Cr, atomic coordinate determination — 15
Optical methods of summation of Fourier series — 135
Optics, crystal, method of invariants in — 46
Orientation, mutual, of phases in the Fe-V system — 377
Orientation of a crystal, determination by x-rays — 516
Orientation of crystals, determination by Laue diagrams — 525
Oriented crystallization of calcium sulfate hemihydrate on the faces of gypsum crystals — 239

Para-bromophenylboric acid, structure of — 564
Paraffins, electron-diffraction determination of C-H distance in — 452
Paraffins, normal, solid solutions of — 303
Paraffins, unit cells of — 375
Pd-Bi system, gamma-phase in — 506
Perovskite-type ferro- and antiferroelectrics, phase transformations in — 759
Perovskite-type ferroelectrics, internal fields of — 471
Phase transformations in perovskite-type ferro- and antiferroelectrics — 759
Phlogopite, thermal lattice expansion of — 92
Photoelectrets, monocrystalline sulfur, polarization anisotropy of — 178
Photoelectrets, piezoelectric effect in — 319
Piezoelectric and elastic properties of terpine monohydrate crystals — 388
Piezoelectric constant d_{31}, determination from the radial vibrations of a disc — 105
Piezoelectric effect in photoelectrets — 319
Piezoelectric, elastic, and dielectric properties of crystals of $MgSO_4 \cdot 7H_2O$ — 722
Piezoelectricity of L-rhamnose monohydrate — 478
Piezoelectric tartrates, unit cells and space groups — 372
Piezomagnetism, symmetry in antiferromagnetics — 344
Photographs, X-ray, of special types, use in study of peculiarities of Al alloys — 574
Polarization anisotropy of monocrystalline sulfur photoelectrets — 178
Polycrystalline substances, method of determining lattice constants — 383
Polymorphism in Nb_2O_5, study of — 750
Porous media, growth of crystals in — 487
Possibilities of structural analysis of crystals — 663
Possible mechanism of twinning in CsI and CsBr crystals — 337
Potassium ammonium tartrate, unit cell and space group — 372
Potassium iodide, temperature-dependence of elastic anisotropy of — 769
Potassium, melting point at high pressures — 512
Potassium tetraborate tetrahydrate — 88
Potassium thiosulfate, $\frac{1}{2}$ hydrate, unit cell and space group — 373
Precipitation phase, unit cell determination — 8
Precise determination of the camera radius by x-ray diffraction photographs — 386
Pressures, high, melting point of potassium at — 512
Problem of ions in crystals — 235
Project for a university course on Fedorov groups — 777
Projections, electron-density, generalized, normal and bounded — 672
Projections, functional, for crystal-structure analysis — 667
Pyrochlore structure type, geometrical criteria of — 96
Pyroelectricity, apparatus for measuring — 53
Pyrrhotite, thermal expansion and magnetostriction of — 390

Quantitative relations in generalized Fourier projections of the electron density of crystals — 531
Quartz crystals, irradiated, capture centers in — 102
Quartz lenses, double-convex, mode of vibration of — 774
Quartz, model for color and luminescence centers in — 633
Quartz, neutron-irradiated, elastic properties of — 726
Quartz, X-irradiated, thermal emission and decolorization in — 635
Question of spiral growth and solution of crystals — 481
Question of the electret state in naphthalene — 772
Question of the growth of crystals in porous media — 487

Radioactive-tracer method, use in study of activator distribution in alkali halide crystals — 510
Rare-earth borides, X-ray study of — 90
Reflection of light from crystals rules for — 325
Refraction and absorption surfaces of absorbing crystals — 592
Refractive index, method for determining in twinned uniaxial crystals — 98
Regularities in the structures of ternary metallic compounds — 465
Relations between critical shear stress, temperature and rate of deformation in zinc monocrystals — 59
Rhamnose (L-) monohydrate, study of dielectric, piezoelectric, and elastic properties — 478
$RhBi_3$, study of — 374
Rhodochrosite, magnetic properties of — 606
Rhythmic growth of triphenylmethane spherulites — 500
Role played by liquid-phase drops in crystal growth and evaporation — 611
Rotation photograph, use in unit cell determination of a precipitation phase — 8
Rules regarding the reflection of light from crystals — 325

Sb, crystallization in thin films and transformations — 716
SbIr, study of — 367
Scattering, diffuse, methods of calculating in study of aging in Al alloys — 582
Scattering factors for electrons for third-period elements — 417
ScB_2, structure of — 76
Screw dislocations, formation at junction of two spreading layers — 236
Screw dislocations, formation in crystal growth around solid particles — 206
Selenate, guanidine aluminum, isomorphs of — 369
Shear stress, critical, temperature, and deformation rate in Zn crystals — 59
Shubnikov groups — 642
Shubnikov groups, new, derivation of — 401
Siderite, magnetic properties of — 606
Signs, arbitrarily assigned, in direct methods of crystal structure determination — 274
Silicates, cyclo-, infrared reflection spectra of — 761
Simple method of precise determination of the lattice constants of polycrystalline substances without the use of standards — 383
Single-crystal diffractometer, use of apparatus URS-501 as — 41
Single crystals, application of a 400 kev electron-diffraction apparatus to study of — 712
Single crystals of sulfate heptahydrates, growth of — 243
Sodium bismuth niobium oxide, structure of mixed crystals — 78
Sodium chloride, deformed crystals of, study by X-ray microbeam — 80
Sodium chloride, temperature factor of — 744
Sodium ions, use in study of capture centers in irradiated quartz crystals — 102
Sodium-mercury compound, possible structure of — 3
Solid particles, formation of screw dislocations in crystal growth around — 206
Solid solution of Ni in Fe, substructure of crystals during transition — 380
Solid solutions, dibenzyl-stilbene, structure of — 707
Solid solutions, mutual orientation of phases upon decomposition, in Fe-V system — 377
Solid solutions of n-paraffins — 303
Solution of crystals and spiral growth — 481
Solution process of monocrystals, effect of ultrasonics — 109
Soviet crystallography text, how to create — 250
Space groups, noncentrosymmetric, impossibility of distributing centrosymmetric molecules in — 393
Space groups, project for a university course on — 777
Spectra, absorption, of cobalt compounds — 171
Spherulites, triphenylmethane, rhythmic growth of — 500
Spiral growth and solution of crystals — 481
Spiral growth of methylnaphthalene — 352
$Sr_2Nb_2O_7$-$Cd_2Nb_2O_7$, structure of — 78
Stannic anisole, structure of — 153
Stannic methoxybenzene, structure of — 153
Stilbene-dibenzyl solid solutions, structure of — 707
Stresses, internal, in synthetic corundum crystals — 599

Structural analysis of crystals, functional projections for — 667
Structural analysis of crystals, possibilities of — 663
Structural types for the composition AB_4 — 232
Structural types with closest atomic packing. Possible structural types with the composition AB_{13} — 362
Structure of mixed crystals of the acridine-anthracene system — 157
Structure of solid solutions of the dibenzyl — stilbene system — 707
Structures, close-packed, of composition AB_{12} — 362
Structures of ternary metallic compounds, regularities in — 465
Study of LiF crystals by the etch method — 731
Study of the crystallization of antimony in thin films. I. α- and β-transformations — 716
Study of the imperfection structure of metallic single crystals by neutron diffraction — 147
Substructure of crystals of the α-solid solution of nickel in iron during polymorphic transformation — 380
Sulfate, guanidine aluminum, isomorphs of — 369
Sulfate heptahydrates, growing single crystals of — 243
Sulfur, monocrystalline photoelectrets, polarization anisotropy of — 178
Summation of Fourier series by optical methods — 135
Surfaces of refraction and absorption of absorbing crystals — 592
Surfaces, wave, for elastic waves in crystals — 627
Surface tension in crystals — 225
Symmetry groups, color — 625
Symmetry, inherent, of atoms and molecules in a crystal — 527
Symmetry of ferromagnetics and antiferromagnetics — 341
Symmetry of magnetostrictive properties of crystals — 765
Symmetry of piezomagnetism of antiferromagnetics — 344
Synthetic corundum crystals, internal stresses in — 599

Tartrates, piezoelectric, unit cells and space groups — 372
Temperature, critical shear stress, and deformation rate in Zn crystals — 59
Temperature-dependence of the elastic anisotropy of potassium iodide — 769
Temperature factor, anisotropic, determination of the parameters — 421
Temperature factor for scattering of x-ray beams in rock salt crystal — 744
Ternary metallic compounds, regularities in structures of — 465
Terpine monohydrate crystals, elastic and piezoelectric properties — 388
Textures, antisymmetry of — 269
Theory of crystals of the noble gases — 395
Thermal emission and decolorization in X-irradiated quartz — 635
Thermal expansion and magnetostriction of pyrrhotite — 390
Thermal expansion of guanidine aluminum sulfate hexahydrate — 230
Thermal lattice expansion of micas — 92
Thermal variation in form of liquid inclusions — 202
Thin films of Fe-Ni alloys, new phase in — 460
Thiourea, structure of — 559
Third-period elements, atomic scattering factors for electrons of — 417
Ti-Cr omega phase, atomic coordinate determination — 15
Ti-H system, phase analysis by X-rays — 544
Tilting microscope stage — 247
Tin-anisole compound, structure of — 153
Titanate, barium, crystallization from molten $BaCl_2$ — 212
Titanate, barium-barium zirconate system, electrical and X-ray studies of — 182
TiU_2, possible structure of — 3
$TlBi_{1.67-1.89}$, possible structure of — 3
Tl_2Se, electron-diffraction study of — 140
Transformations in thin films of antimony — 716
Tribromoboronsulfide, structure of — 569
Triphenylmethane, rhythmic growth of aperulites — 500
Tungsten nitrides, electron-diffraction study — 551
Twin boundary of mechanically-twinned calcite, lattice distortion at — 328
Twinned uniaxial crystals, method for determining refractive index — 98
Twinned zinc, zone of accommodation in — 332
Twinning, mechanism of, in CsI and CsBr — 337

UHg_2, UZr_2, and U_2Ti, possible structures of — 3
Ultrasonic pulse method of measuring the elastic moduli of monoclinic crystals — 630
Ultrasonics, effect on solution of monocrystals — 109
Uniaxial twinned crystals, method for determining refractive index — 98
Unit cell determination of a precipitation phase from one rotation photograph of a single crystal of the original phase along with particles of the new phase — 8
Unit cells and space groups of piezoelectric crystals of $KHC_4H_4O_6$, $NH_4HC_4H_4O_6$ and $C_6H_5CH(CH_3)NH_2 \cdot C_4H_6O_6$ — 372
Unit cells of some paraffins — 375
University course on Fedorov groups, project for — 777
USR-501, use as single-crystal diffractometer — 41

Use of the apparatus URS-501 as a single-crystal diffractometer — 41
Utilization of artificial anistropy for directed splitting of material (artificial "cleavage") — 73

V-Fe system, mutual orientation of phases upon decomposition of solid solutions — 377
Vibration of double-convex quartz lenses, mode of — 774
Vibrations, radial, use in determination of the piezoelectric constant d_{21} — 105
Vibrations, ultrasonic, effect on solution of monocrystals — 109

Wave surfaces for elastic waves in crystals — 627
Way of creating a full-fledged Soviet crystallography text — 250
W-N compounds, electron-diffraction study — 551

X-irradiated quartz, thermal emission and decolorization in — 635
X-ray camera for the study of crystals over the range -175°C to +300°C — 639
X-ray determination of the coefficient of thermal expansion of guanidine aluminum sulfate hexahydrate-$C(NH_2)_3[Al(H_2O_6)]\cdot[SO_4]_2$ — 230
X-ray determination of the orientation of a crystal — 516
X-ray diffraction photographs, use in determining camera radius — 386
X-ray diffraction study of diparatoluidine cobalt diiodide — 365
X-ray diffraction study of the borides: YbB_6, LuB_4, HoB_4 and GdB_4 — 90
X-ray diffraction study of the structure of IrSb — 367
X-ray diffraction study of the zone of accommodation in twinned zinc — 332
X-ray diffractometry, conference on — 399
X-ray investigation of aging in aluminum alloys. V. The use of special types of photographs to elucidate the peculiarities of the structure of alloys — 574
X-ray investigation of aging in aluminum alloys. VI. Methods of calculating diffuse scattering — 582
X-ray investigation of polymorphism in Nb_2O_5 — 750
X-ray investigation of the γ-phase in the bismuth-palladium system — 506
X-ray structural investigation of Ni^{II} and Co^{II} compounds of the type $MePy_4X_2$. II. The structure of crystals of nickel tetrapyridine-dibromide and cobalt tetrapyridine-bromide — 684
X-ray structural investigation of Ni^{II} and Co^{II} compounds of the type $Me^{II}Py_4X_2$. III. The structure of crystals of nickel diisorhodano-tetrapyridine and cobalt diisorhodanotetra-pyridine — 694
X-ray structural phase analysis of the Zr-H and Ti-H systems — 544
X-ray study of solid inclusions in diamonds — 494

YbB_6, X-ray study of — 90

Zinc monocrystals, critical shear stress, temperature, and deformation rate in — 59
Zinc, twinned, zone of accommodation in — 332
Zirconate, barium-barium titanate system, electrical and X-ray studies of — 182
Zone of accommodation in twinned zinc — 332
Zr-H system, phase analysis by X-rays — 544
Zr_3U, possible structure of — 3
